

ECODORA pneumatic double-diaphragm pumps are designed and manufactured for pumping a wide range of fluids even with high viscosities and with suspended solids.

In being ATEX certified, they can also be used for heavy applications such as in places with high humidity or with potentially explosive atmosphere.

- Self-priming capability
- Easy adjustment of delivery
- They do not become damaged in case of prolonged operation when empty

are some of the features that make these pumps particularly versatile and appreciated in all work environments. The wide range of materials used for the pumps makes it easy to identify the model having the best chemical compatibility with the fluid to be pumped and for the work environment.
